# 1. General

## 1.1 Purpose

This document describes the new functionalities and fixes implemented in To-Increase BC BIS for Dynamics 365 Business Central V18 as well as the known issues at release time.

## 1.2 Audience

Partners and customers that will install or upgrade to enable the latest functionalities and features released in this Version of To-Increase BC ANY.

## 1.3 Content List

Product	Version	Remarks
BC BIS	Business Central V18.5	

1. Aligned with Microsoft Dynamics 365 Business Central 2021 Initial release (Wave 1), update 18.5
2. ANY has been aligned with version Build 18.5

## 2. New Features

Refer to [https://business-central.to-increase.com/md/en-US/ANY\\_WHatsnew](https://business-central.to-increase.com/md/en-US/ANY_WHatsnew) for an overview of the new features and structure.

### 2.1 Version number update

Version numbers from To-Increase horizontals will no longer be aligned with the current version of Dynamics 365 Business Central, but will stay for now on 18.4

The goal is to align with the minimum required version of D365 Business Central, so that it's easy to determine if a release can be installed on a specific Business Central environment.

For now the minimum version of D365 Business Central will remain 18.0.

This method of versioning will be applied to our vertical solutions in due time.

### 3. Bug Fixes
