# 1. General

## 1.1 Purpose

This document describes the new functionalities and fixes implemented in To-Increase BC BIS for Dynamics 365 Business Central V15 as well as the known issues at release time.

## 1.2 Audience

Partners and customers that will install or upgrade to enable the latest functionalities and features released in this Version of To-Increase BC BIS.

## 1.3 Content list

Product	Version	Remarks
BC BIS	Business Central V16	

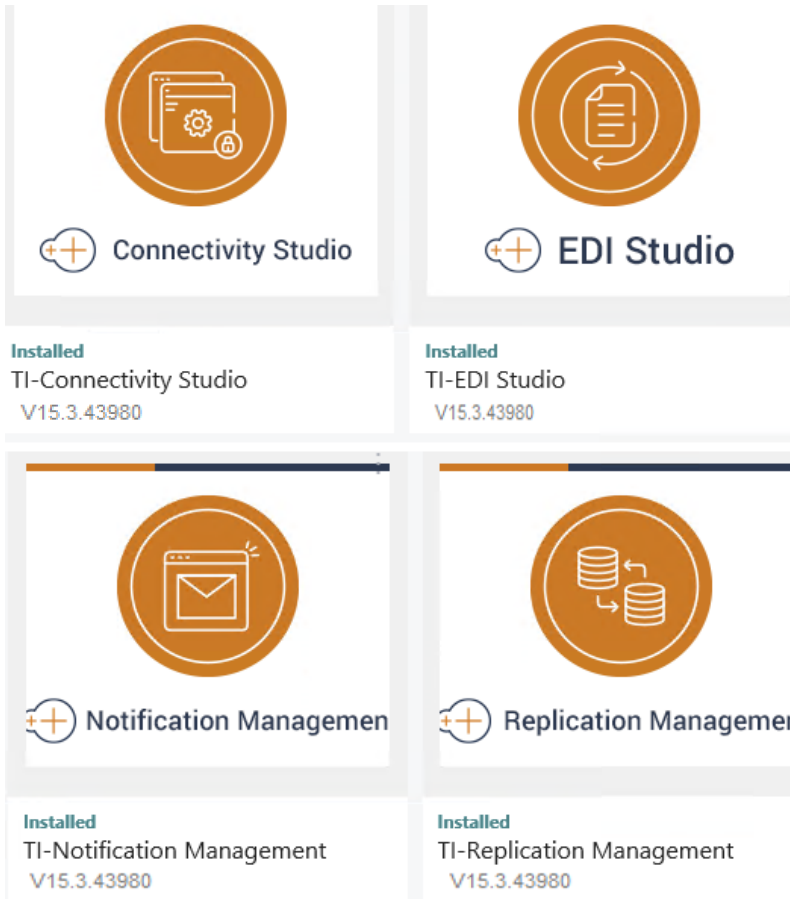

1. Aligned with Microsoft Dynamics 365 Business Central 2020 Release Wave 1, update 16
2. BIS has been aligned with version Build 16.0.....
3. BIS code has been converted from C/AL to AL, web client pages have been updated where necessary
4. BIS is now an extension.
5. BIS apps can be installed separately

## 2. New features

This is a major release where the functionality is migrated as is, the platform has been converted from C/AL to AL and the Windows client is no longer available. The product is now shipped as extensions and consists of the following applications:

- TI-Common (depend-App)
- BIS App (depend-App)
- Connectivity Studio App
- Notification Management App
- EDI Studio App
- Replication Management App

Refer to [https://business-central.to-increase.com/md/en-US/BIS\\_Whatsnew](https://business-central.to-increase.com/md/en-US/BIS_Whatsnew) for an overview of new features.

## 2.1 filter on document type in RECORDCHANGEEVENT

In the following out of the box EDI connections, filters are applied to refer to sales orders and purchase orders. The filter is set to Document is Released. This means, that when a Sales/Purchase Order is released, the Pipeline gets triggered. Before the case was that all sales & purchase documents were taking into account during the trigger process.

- TI\_EDI\_1.PO.OUT - filter on the "Document Type" in the RECORDCHANGEEVENT
- TI\_EDI\_3.CONF.OUT - filter on the "Document Type" in the RECORDCHANGEEVENT

## 3. Bugfix list
