1. General

1.1 Purpose

This document describes the new functionalities and fixes implemented in To-Increase BC BIS for Dynamics 365 Business Central V18 as well as the known issues at release time.

1.2 Audience

Partners and customers that will install or upgrade to enable the latest functionalities and features released in this version of To-Increase BC BIS.

1.3 Content List

Product	Version	Remarks
BC BIS	Business Central V18.5	On Premise

1. Aligned with Microsoft Dynamics 365 Business Central 2021 initial release (Wave 1), update 18.5
2. BIS version number remains on 18.4 due to changes, see Version number update

2. New Features

Refer to https://business-central.to-increase.com/md/en-US/BIS_Whatsnew for an overview of the new features and structure.

New features for this release contain.

- JSON to XML Translator activity
- XML to JSON Translator activity

2.1 Version number update

Version numbers from To-Increase horizontals will no longer be aligned with the current version of Dynamics 365 Business Central, but will stay for now on 18.4

The goal is to align with the minimum required version of D365 Business Central, so that it's easy to determine if a release can be installed on a specific Business Central environment.

For now the minimum version of D365 Business Central will remain 18.0.

This method of versioning will be applied to our vertical solutions in due time.

3. Bugs

3.1 Bug Fixes

The following issues are resolved with build 18.4.63309.0

ID	Title
109920	Validation of custom connector is moved from the import stage to check configuration stage

4. Upgrading

The following page explains how to upgrade in BIS on Business Central On Premise versions:
