1. Purpose

This document describes the fixes implemented in To-Increase Food Manufacturing & Distribution for Microsoft Dynamics 365 Business Central 2022 Release Wave 1.

This release replaces Food for Microsoft Dynamics 365 Business Central 2021 Fall Update and is based on Update 20.4 for Microsoft Dynamics 365 Business Central 2022 Release Wave 1 (Application Build 20.4.202403).

2. Audience

This document is primarily meant for product- and implementation consultants familiar with the concepts of Food Manufacturing & Distribution.

This document explains the content of the delivery package to consultants of To-Increase partners.

2.1 Links to To-Increase OnlineHelp

- General: Home Page - To-Increase Documentation
- Food: To-Increase Food Manufacturing & Distribution
- What's New in Food: What is New in Food Manufacturing & Distribution
- Release Notes: Food Manufacturing & Distribution Release Notes

2.2 OnlineHelp especially for EmbedApp

The EmbedApp may respond differently in some cases than the standard Microsoft Dynamics 365 Business Central SaaS environment.

We see this especially when installing 3rd Party ISV apps and when using so-called Connector Apps.

Below are 2 links that may provide more insight on this:

- 3rd Party ISV apps instructions: ISV Instructions
- Connector Apps: Connecting to EmbedApp

3. Deliverables

Besides 2 On-Premise packages (W1 & NA) we also deliver a SaaS EmbedApp package.

This SaaS EmbedApp is only available in the USA, localized as NA, in a Microsoft Azure Cloud environment, managed by To-Increase.

3.1 Deliverables for On-Premise

Each release contains the W1 and the NA localization.

The Artifacts folder contains:

Food Artifacts	W1 Version No.	NA Version No.
FOOD Application	20.4.202403.0	20.4.202403.0
FOOD ESHA Genesis Integration	20.4.202403.0	20.4.202403.0
FOOD Item Lifecycle Management	20.4.202403.0	20.4.202403.0
TI-Lifecycle Base	19.0.67748.0	19.0.67748.0
TI-Common	19.0.67740.0	19.0.67740.0
FOOD Label Printing	20.4.202403.0	20.4.202403.0
TI-BIS	20.0.71838.0	20.0.71838.0
TI-Common	19.0.70480.0	19.0.70480.0
FOOD Anywhere	20.4.202403.0	20.4.202403.0
ANY	19.0.71890.0	19.0.71890.0
TI-BIS	20.0.71838.0	20.0.71838.0
TI-Common	19.0.70480.0	19.0.70480.0
FOOD Bank Deposits	20.4.202403.0	20.4.202403.0

The extensions in the TI- ... folders are mandatory and part of the base installation for To-Increase applications.

- Refer to Installation instructions to learn how to install these artifacts.
- Refer to Checklist to create a demo database with extended CRONUS data to learn how to create a demo database from the included resources.
- For ESHA we deliver interface-data for the Genesis-module and database
- For Food Label Connections we provide two examples of labels, 1 for containers and 1 for cases. To be used with the Labelprinting module.
- For Food Lifecycles a number of example-lifecycles are available for ILM in Food.

- For Food Anywhere the out of the box processes are delivered for the Warehouse Scanning Solution BC Anywhere.

We deliver Runtime Packages for Business Central On-Premises. When the runtime package is generated on the server, the developer license is checked for permissions to the used extension IDs. The extension in a runtime package can then be installed on servers that do not have a developer license; the server only needs permissions to run the objects, but not to modify or insert them.

3.2 Deliverables US EmbedApp

As US EmbedApp follows Modern Lifecycle Policy of Microsoft it follows the majors and minors for Microsoft Dynamics 365 Business Central SaaS.

See our highest available version for more information.

4. Granule List on-premise

To-Increase **FOOD Manufacturing & Distribution (FOOD)** for Microsoft Dynamics 365 Business Central consists of the granules listed below.

These granules must be listed in the **Microsoft Dynamics 365 Business Central, Microsoft Dynamics 365 Business Central on premises** and **Microsoft Dynamics 365 Business Central on premises subscription** licenses based on the customer's purchase.

Product	Granule	Name	Version	Release
Solution Center

FOOD - Value features				

N208	370.02.240	Deduction Management	2022 Wave 1	20.4
N209	370.02.070	Rebates/Commissions/Billback/Promo		
N210	370.02.270	Maintenance Management		
N211	370.02.050	Dual UOM & Catch Weight		
N221	370.02.280	Repack		
FOOD - Lifecycle Management				
FILM	370.02.330	Food Item Lifecycle Management		
FOOD – Anywhere				
	370.02.350	NAV Anywhere for Food**	2022 Wave 1	20.4
	11.158.610	NAV Anywhere***		
FOOD – Bank Deposits				
BankDep		Extension		

Food Anywhere consists of 11 out-of-the-box processes that are being shipped upon receipt or an order:

Process description
Warehouse Pick
Warehouse Shipment
Warehouse Receipt
Warehouse Put-away
Production Consumption
Production Output
(Warehouse) Physical Count
Warehouse Movement
Bin-to-Bin Movement (ad-hoc)
Container Management

* Labelling - Software has been integrated in 370.02.210 Basic Labelling

** Please note that NAV Anywhere for Food processes are based on some of the existing Food modules.

*** Please note that separate ISV Device CALs are mandatory when using NAV Anywhere for Food.

5. New Features Summary

This is a major release where the functionality is migrated as is and adapted to new Microsoft Dynamics 365 Business Central features as needed.

Refer to What's New in FOOD for D365 Business Central for an overview of new features and links to the corresponding manual.

Microsoft is continuously adding new features in the application directly and via Feature Management. Sometimes these are public preview and will be made generally available in future releases, in other cases, they are already general available, and you have the choice to activate them.

Currently, we are not testing compatibility with all new features or combinations.

Once a feature is enabled at the customer environment and in case of any issues or questions related to new standard features and our solutions, kindly contact us via To-Increase support.

6. Post Release Defects Resolutions

In case of an Error, To-Increase may provide a Hotfix on a reasonable efforts basis in a way it considers appropriate in its discretion. To-Increase cannot be obliged to provide Hotfixes if Client has not deployed the latest Release or the Release second to the latest Release and/or is not using a supported version of Microsoft Dynamics.

To ensure our customers can fully leverage the latest enhancements, features, and quality improvements, we are committed to providing increased support by keeping them updated with the most recent releases. Our data indicates that customers on the latest version experience fewer issues and requests, demonstrate greater resilience, and effectively enhance their organizational efficiency.

6.1 Post Release Defects Resolutions

In this update the following issues have been resolved:

ID*	Title	Case**
183730	Transfer Order is creating a false warehouse entry. However, when put-away is done this false warehouse entry is gone. Adjustments have been made to TempWhseJnlLine2.	CS00232313
	Object(s): CU6500	

6.2 Other Resolutions

In this update the following has been resolved or added:

ID*	Title	Case**

*ID: Azure DevOps Work Item

**Case: Internally found defect or external found defect, external is marked with Case no. from SNOW

7. Upgrading

When upgrading from previous versions of FOOD please contact To-Increase Support for the relevant upgrade kits and upgrade guidelines.

7.1 Attention points Per Tenant Extensions in SaaS

For upgrading SaaS environments extra attention is needed for installed Per Tenant Extensions as they can't upgrade automatically.

See Microsoft docs related pages:

- [Environments that can't get updated](#)
- [Upgrades and per-tenant extensions](#)
- [Behavior on upgrade](#)
- [Uninstall an app](#)
