Document Information

Title	Food Manufacturing & Distribution for Dynamics 365 Business Central 2022 Release Wave 2, Update 21.4
Subtitle (Subject)	Release Notes for Monthly update Januari 2024
Solution Suite	Food Manufacturing & Distribution
Category	Release Notes
Author	Olaf Jorritsma
Published Date	1/2/2024
Status	Final
Comments	None

1.   Purpose

This document describes the fixes implemented in To-Increase Food Manufacturing & Distribution for Microsoft Dynamics 365 Business Central 2022 Release Wave 2.

This release replaces Food for Microsoft Dynamics 365 Business Central 2022 Wave 1 Spring Update and is based on Update 21.2 for Microsoft Dynamics 365 Business Central 2022 Wave 2 release (Application Build 21.4.202401).

2. Audience

This document is primarily meant for product- and implementation consultants familiar with the concepts of Food Manufacturing & Distribution.

This document explains the content of the delivery package to consultants of To-Increase partners.

2.1 Links to To-Increase OnlineHelp

- General: Home Page - To-Increase Documentation
- Food: To-Increase Food Manufacturing & Distribution
- What's New in Food: What is New in Food Manufacturing & Distribution
- Release Notes: Food Manufacturing & Distribution Release Notes

2.2 OnlineHelp especially for EmbedApp

The EmbedApp may respond differently in some cases than the standard Microsoft Dynamics 365 Business Central SaaS environment.

We see this especially when installing 3rd Party ISV apps and when using so-called Connector Apps.

Below are 2 links that may provide more insight on this:
- 3rd Party ISV apps instructions: ISV Instructions
- Connector Apps: Connecting to EmbedApp

3.   Deliverables

Besides 2 On-Premise packages (W1 & NA) we also deliver a SaaS EmbedApp package.

This SaaS EmbedApp is only available in the USA, localized as NA, in a Microsoft Azure Cloud environment, managed by To-Increase.

3.1   Deliverables for On-Premise

Each release contains the W1 and the NA localization.

The Artifacts folder contains:

Food Artifacts	W1 Version No.	NA Version No.
FOOD Application	21.4.202401.0	21.4.202401.0
FOOD ESHA Genesis Integration	21.4.202401.0	21.4.202401.0
FOOD Item Lifecycle Management	21.4.202401.0	21.4.202401.0
TI-Lifecycle Base	19.0.84710.0	19.0.84710.0
TI-Common	19.0.84703.0	19.0.84703.0
FOOD Label Printing	21.4.202401.0	21.4.202401.0
TI-BIS	20.0.84711.0	20.0.84711.0
TI-Common	19.0.84703.0	19.0.84703.0
FOOD Anywhere	21.4.202401.0	21.4.202401.0
Anywhere Mobility Studio	19.0.84994.0	19.0.84994.0
TI-BIS	20.0.84711.0	20.0.84711.0
TI-Common	19.0.84703.0	19.0.84703.0
FOOD Bank Deposits	21.4.202401.0	21.4.202401.0

The extensions in the TI- … folders are mandatory and part of the base installation for To-Increase applications.

- Refer to Installation instructions to learn how to install these artifacts.
- Refer to Checklist to create a demo database with extended CRONUS data to learn how to create a demo database from the included resources.
- For ESHA we deliver interface-data for the Genesis-module and database
- For Food Label Connections we provide two examples of labels, 1 for containers and 1 for cases. To be used with the Labelprinting module.
- For Food Lifecycles a number of example-lifecycles are available for ILM in Food.

- For Anywhere for Food the out of the box processes are delivered for the Warehouse Scanning Solution Anywhere Mobility Studio.

We deliver Runtime Packages for Business Central On-Premises. When the runtime package is generated on the server, the developer license is checked for permissions to the used extension IDs. The extension in a runtime package can then be installed on servers that do not have a developer license; the server only needs permissions to run the objects, but not to modify or insert them.

3.2 Deliverables US EmbedApp

As US EmbedApp follows Modern Lifecycle Policy of Microsoft it follows the majors and minors for Microsoft Dynamics 365 Business Central SaaS.

See our highest available version for more information.

4.   Granule List on-premise

To-Increase **FOOD Manufacturing & Distribution (FOOD)** for Microsoft Dynamics 365 Business Central consists of the granules listed below.

These granules must be listed in the **Microsoft Dynamics 365 Business Central, Microsoft Dynamics 365 Business Central on premises** and **Microsoft Dynamics 365 Business Central on premises subscription** licenses based on the customer's purchase.

Product	Granule	Name	Version	Release
Solution Center				
N108	11.068.690	Integration Platform Base	2022 Wave 2	21.4
N108_WS	11.068.810	Life Cycle Management

FOOD - Value features				

N208	370.02.240	Deduction Management		
N209	370.02.070	Rebates/Commissions/Billback/Promo	2022 Wave 2	21.4
N210	370.02.270	Maintenance Management		
N211	370.02.050	Dual UOM & Catch Weight		
N221	370.02.280	Repack		
FOOD - Lifecycle Management				
FILM	370.02.330	Food Item Lifecycle Management		
FOOD – Anywhere				
	370.02.350	Anywhere for Food**	2022 Wave 2	21.4
	11.158.610	Anywhere Mobility Studio ***		
FOOD – Bank Deposits				
BankDep		Extension		

Anywhere for Food consists of 11 out-of-the-box processes that are being shipped upon receipt or an order:

Process description
Warehouse Pick
Warehouse Shipment
Warehouse Receipt
Warehouse Put-away
Production Consumption
Production Output
(Warehouse) Physical Count
Warehouse Movement
Bin-to-Bin Movement (ad-hoc)
Container Management

* Labelling - Software has been integrated in 370.02.210 Basic Labelling

** Please note that Anywhere for Food processes are based on some of the existing Food modules.

*** Please note that separate ISV Device CALs are mandatory when using Anywhere for Food.

5.   New Features Summary

This is a minor release where the functionality is migrated as is and adapted to new Microsoft Dynamics 365 Business Central features as needed.

Refer to What's New in FOOD for D365 Business Central for an overview of new features and links to the corresponding manual.

Microsoft is continuously adding new features in the application directly and via Feature Management. Sometimes these are public preview and will be made generally available in future releases, in other cases, they are already general available, and you have the choice to activate them.

Currently, we are not testing compatibility with all new features or combinations.

Once a feature is enabled at the customer environment and in case of any issues or questions related to new standard features and our solutions, kindly contact us via To-Increase support.

5.1   Supported Microsoft features in this release

To-Increase Food has been modified or integrated with Microsoft functionality:

(Words in bold contain a link to the relevant Microsoft page)

5.2   Remarks on Microsoft features

(Words in bold contain a link to the relevant Microsoft page)

Behavior changes due to **Auto-save as you work**.

Microsoft added the new feature "Auto-save with every field save" in the 2022 Wave 2 release, when this is enabled changes (OnModify) made by the user will be saved immediately.

This has resulted in Business Central responding differently to alerts and errors as users are used to.

Also To-Increase is not able to change this behavior by adjusting code.

Therefore we advise not to enable this feature, of course, users may use this feature if they want to, but To-Increase cannot adjust the changed behavior if users complain about it.

In 2020 Wave 2 release Microsoft added the feature **New sales pricing experience**, as To-Increase we do not support this new feature at the moment.

The To-Increase pricing enhancements are built on the old pricing system of Microsoft.

As the new sales pricing experience is still under construction, auto enablement is even postponed several times, and old pricing system is not yet retired we advise not to enable this feature as this will give an error.

Microsoft is busy to make changes to the new sales pricing experience, but not expect them to be ready before Q2-2023, so Microsoft postponed the retirement of the old pricing system.

6.   Post Release Defects Resolutions

In case of an Error, To-Increase may provide a Hotfix on a reasonable efforts basis in a way it considers appropriate in its discretion. To-Increase cannot be obliged to provide Hotfixes if Client has not deployed the latest Release or the Release second to the latest Release and/or is not using a supported version of Microsoft Dynamics.

To ensure our customers can fully leverage the latest enhancements, features, and quality improvements, we are committed to providing increased support by keeping them updated with the most recent releases. Our data indicates that customers on the latest version experience fewer issues and requests, demonstrate greater resilience, and effectively enhance their organizational efficiency.

6.1   Post Release Defects Resolutions

In this update the following issues have been resolved:

ID*	Title	Case**
180783	**External document no. string length on Sales Order gives error when using Accurals** Issue fixed.	CS00227860
	Object(s): CU37002122/CU37002123/T37002132/T37002142	

6.2   Other Resolutions

In this update the following has been resolved or added:

ID*	Title	Case**

*ID: Azure DevOps Work Item

**Case: Internally found defect or external found defect, external is marked with Case no. from SNOW

7.   Upgrading

When upgrading from previous versions of FOOD please contact To-Increase Support for the relevant upgrade kits and upgrade guidelines.

7.1   Attention points Per Tenant Extensions in SaaS

For upgrading SaaS environments extra attention is needed for installed Per Tenant Extensions as they can't upgrade automatically.

See Microsoft docs related pages:

- Environments that can't get updated
- Upgrades and per-tenant extensions
- Behavior on upgrade
- Uninstall an app
